SUMMARY

DevOps Engineer with about 2 years of experience supporting business-critical production applications across development, UAT, and production. Automates CI/CD, manages AWS and Linux deployments, and troubleshoots application and infrastructure issues.

SKILLS

Production experience: AWS (EC2, S3), Ubuntu/Linux administration, Git, GitHub Actions, Jenkins, Maven, Java WAR, Tomcat, systemd, PM2, Nginx (reverse proxy, SSL/TLS, load balancing), MySQL, MongoDB, Redis, Bash, S3 build artifact storage, ELK stack, GoAccess.

Hands-on (projects): Docker, Kubernetes, Helm, Nginx Ingress, Prometheus, Grafana, K3s, Linux, GitHub Actions.

EXPERIENCE

DevOps Engineer

Zerocode Innovations Pvt Ltd | Hyderabad, India | Dec 2024 - Present

- Manage development, UAT, and production environments, supporting 20+ production deployments per month for business-critical production applications.
- Automate deployments with a push-triggered GitHub Actions pipeline that installs dependencies, builds, and deploys the latest code over SSH, replacing manual multi-step deployments with a repeatable pipeline.
- Build and support Java WAR workflows with Jenkins and Maven, Tomcat deployments, and S3-based build artifact storage.
- Create Bash monitoring scripts with Google Chat alerts, schedule them with systemd timers, and add MySQL health and thread alerting.
- Configure Nginx reverse proxy, SSL/TLS, and load balancing for application delivery across AWS EC2 and Ubuntu/Linux systems.
- Troubleshoot deployments and production operations through log analysis, Nginx and HTTP error investigation, SSL troubleshooting, and disk, memory, and resource monitoring.

PROJECTS

End-to-End CI/CD Pipeline with Kubernetes | Personal project

GitHub Actions, Docker, Kubernetes, Helm, Nginx Ingress, Prometheus, Grafana, Linux

- Built a personal end-to-end CI/CD pipeline with GitHub Actions, Docker, Kubernetes, and Helm.
- Project stack includes Nginx Ingress, Prometheus, Grafana, and Linux.

BlogCMS Deployment | Personal deployment of an open-source application

Go API, Vue frontend, K3s, Nginx, Let's Encrypt

- Cloned and deployed the open-source CMS, without authoring the application, to a single-node K3s cluster; live at https://cmsapp.duckdns.org.
- Ran API and frontend pods with a 5Gi uploads PVC behind host Nginx and Let's Encrypt TLS.
- Used health and readiness endpoints, deployment scripts, and database backups to support the deployment.

EDUCATION

B.Sc. in Computer Science | Medha Degree College (Yogi Vemana University) | Kadapa | Aug 2021 - Jun 2024

COURSES & TRAINING
